

std::true\_type

```
classDiagram
    class myFunc_is_one_of["myFunc::is_one_of<T, T, 1, V>"]
    class std_true_type["std::true_type"]
    myFunc_is_one_of --|> std_true_type
```

The diagram illustrates an inheritance relationship. A class box at the bottom, labeled 'myFunc::is\_one\_of<T, T, 1, V>', is shaded gray and has three horizontal compartments. A blue arrow with an open triangular head points from the top compartment of this box to the top compartment of a white class box at the top labeled 'std::true\_type', which also has three horizontal compartments.
